

King Edward Avenue runs right through our Lowertown and Sandy Hill communities. The truck traffic has been a danger and an eyesore for decades. NOW we're reclaiming our main street—and you can help make it happen!

WE can use a little help from YOU!

Who are WE?

THE KING EDWARD AVENUE TASK FORCE
Here is what we have done lately.

- Stopped STO buses from parking and idling on our streets
- Lobbied successfully to have speeds reduced
- Helped put a portable air quality monitor at the Andrew Fleck Child Care Centre
- Convinced the City to study the four-lane option
- Represented our community on a new interprovincial bridge study to get the big trucks off King Edward
- Took our message to the public and elected officials with vigils, demonstrations, letters and media stories

Who are YOU?

People with energy and skills to help speed up transforming King Edward from community eyesore to liveable main street—with bike lanes, trees, shops and homes.

What could you do?

- Participate – get on our mailing/email list, come to meetings
- Work on new projects, such as community murals, greening King Edward, air quality testing, speed monitoring
- Write letters • Take photos • Fundraise
- Help organize meetings, rallies, events
- Contribute your ideas

Choose your issue and get involved!

**It's a great feeling to help make a change!
Why now? It's election year—let's attract attention and help from politicians.**
